

**Mar 17th:** Between 25 and 40cm's of fresh snow fell throughout the Park on Thursday in to Friday, and a few light flurries fell overnight on Friday. All trails groomed before Mar 15th will have at least 25cm's of heavy snow on top of the old grooming. With the current trend of daytime temperatures above freezing, expect the possibility of icy conditions in the mornings, softening if and when temperatures rise. The trees have re-loaded and will be dropping plentiful snow bombs and other tree debris on the trails, particularly further south and at higher elevations where the snow load is greater. **Elk Pass is closed between N Hydroline junction and Patterson due to avalanche hazard.** Note: Fat biking is not permitted on this trail system.
